PRAESID
ENERGY & COMMUNICATION MODULE

MODULE GUIDE

Stay informed and self-sufficient during an outage

WHY THIS MODULE MATTERS

When an outage leaves your home without lighting, network access or electricity, staying reachable and informed is essential. This module brings together equipment to provide light, receive instructions and maintain essential communications.

Phone + lighting + radio

20,000 mAh power reserve

Hand-crank & solar charging

MODULE CONTENTS

Rechargeable headlamp Lights up to 60 m ahead while keeping your hands free.	1
Family LED lantern Adjustable lighting to make a room or campsite safer.	1
A320 emergency radio Hand-crank or solar-rechargeable radio to keep you informed.	1
Power bank 20,000 mAh to maintain essential communications.	1

Essentials organised for quick access and easy use when every minute counts.

Getting ready

- Fully charge all three devices and test every mode.
- Schedule a check every six months and keep the cables with the module.
- Note the radio frequencies and instructions issued by local authorities.

During use

- Conserve energy: use the lowest power setting you need.
- Keep batteries away from heat, water and impacts.
- Recharge the equipment regularly so it remains ready to use.

Light • Inform • Signal • Recharge
