Water: your first priority in an emergency

WHY THIS MODULE MATTERS

A natural disaster, contamination of the water supply or a prolonged outage can disrupt access to drinking water. This module helps the whole family collect, filter, treat and store safer water during the first 72 hours.

Filtration + additional treatment

Up to 150 L filtered

10 L storage capacity

MODULE CONTENTS

10 L collapsible water container Folds flat when empty for easy water storage and transport.	1
1 L family filter bottle Filters water directly, with a capacity of up to 150 L.	1
500 ml adult water bottles Durable bottles with time markers to encourage regular drinking.	2
Chlorine dioxide water purification tablets Stated dosage: 1 g per 20 L of water; allow 15 to 30 minutes to act.	1 bottle

Essentials organised for quick access and easy use when every minute counts.

Getting ready

- Rinse the containers and read the filter instructions before first use.
- Identify two separate containers: one for untreated water and one for filtered water.
- Check the expiry date and bottle integrity; stated shelf life: 24 months.

During use

- Clear water is not necessarily safe to drink.
- Never use water contaminated with chemicals or fuel, or seawater.
- Strictly follow the dosage, contact time and all precautions on the label.

Collect • Settle • Filter • Treat • Store
